

BAYOU STEEL CORPORATION
P.O. BOX 5000 - LaPlace, LA 70069-1156

To whom it may Concern:

We certify that all steel products that we produce are melted from 100% scrap.

At Bayou Steel we consume industrial and post consumer scrap in our process. We do not track actual percentage of usage in our process. However, our best estimate is approximately 90 % post consumer scrap and 10 % industrial scrap.

An estimated 90% of the scrap used in our process is procured within a 500 mile radius of the jobsite.

If I may be of any further assistance, please do not hesitate to call me.

Sincerely,

A handwritten signature in black ink that reads "Mark Edwards". The signature is written in a cursive, flowing style.

Mark Edwards
